DIGI-STORY: OUR JOURNEY, RESULTS AND LASTING IMPACT

As DIGI-Story approaches the end of its Erasmus+ journey, we look back at a collaborative experience dedicated to empowering young people through media literacy, responsible online behaviour and transmedia storytelling.
From international cooperation to educational resource development and local dissemination activities, the project has brought together different perspectives around one shared objective: helping young people navigate the digital world with confidence, awareness and creativity.

DISCOVER THE DIGI-STORY RESOURCES

One of the project's key contributions is the development of educational materials addressing essential aspects of digital citizenship.
Online Behaviour Guide
A practical resource supporting young people in understanding online opportunities and risks, protecting their privacy, assessing digital information and adopting safer and more responsible online behaviours.
Transmedia Storytelling Materials
Digital narratives and audiovisual resources exploring themes such as social media, digital footprints, data protection, online safety and responsible content creation.
Digital Educational Materials
Resources intended to support non-formal education, youth work and participatory learning, helping educators introduce media literacy through interactive and creative approaches.

LEARNING ACROSS BORDERS

International collaboration has been an essential part of the DIGI-Story experience.
Activities involving partners and participants from Portugal, the Czech Republic and Spain have created opportunities for exchanging ideas, exploring new digital tools and developing a shared understanding of responsible digital citizenship.
The international learning activity in Lisbon was particularly important in connecting media literacy with practical storytelling experiences, collaborative learning and cultural exchange.
These experiences illustrate how digital storytelling can support creativity, communication and meaningful participation.

BRINGING DIGI-STORY CLOSER TO COMMUNITIES

Through national dissemination and multiplier events, the project has introduced its objectives and educational materials to young people, teachers, youth workers and other stakeholders.
These activities have provided opportunities to present the resources, gather feedback and discuss their potential applications in educational and community settings.
They have also contributed to raising awareness about the importance of critical thinking, information reliability and ethical digital participation.

BEYOND THE PROJECT: A SUSTAINABLE DIGITAL LEGACY

The value of DIGI-Story extends beyond its implementation period.
Its educational approach and resources offer opportunities for continued use in youth organisations, schools and non-formal learning environments.
By encouraging the reuse and dissemination of project materials, DIGI-Story seeks to contribute to the development of more informed, inclusive and digitally responsible communities.
The next challenge is to translate these resources into continued educational practice and inspire further initiatives in media literacy and youth participation.

FROM LEARNING TO ACTION: BE THE NEXT DIGITAL STORYTELLER!

DIGI-Story is more than a collection of educational resources. It is an invitation to rethink how we interact, communicate and create in the digital world.
Now it's your turn to put these skills into practice! Challenge yourself to:

- Think critically: Question what you see online and verify information before sharing it.
- Create responsibly: Use digital platforms to tell meaningful stories and inspire positive change.
- Protect your digital identity: Make informed decisions about privacy, security and your online footprint.
- Amplify your voice: Share your ideas, experiences and perspectives through creative digital storytelling.
- Inspire others: Encourage your community to become more conscious, ethical and active digital citizens.

Every click is a choice. Every post tells a story. Make yours count!
The DIGI-Story journey continues through you. Explore our resources, create your own stories and help shape a safer, smarter and more creative digital future.

DIGI-Story has been made possible through the cooperation of its partners and the participation of young people, educators and stakeholders who have contributed their ideas, experiences and commitment.
As we prepare to close this chapter, we invite you to discover the project's resources, share them within your networks and continue promoting responsible digital citizenship.
The project may be coming to an end, but the stories, skills and ideas it has inspired can continue to grow.
